INTRODUCTION

- Date Of Birth : 17 June 2000
- Nationality : Malaysian
- Marital Status : Single
- Gender : Male

EXPERIENCE

Solution Analyst **Mindteck(Contract-Nexperia Malaysia Sdn. Bhd.)** Senawang,Negeri Sembilan 10/2025-Present

- Developed and delivered automation software using C# and the .NET Framework for the Tuah & Jebat semiconductor manufacturing projects, improving machine configuration, production workflow efficiency, and real-time manufacturing operations.
- Successfully integrated PLCs, HMIs, industrial equipment, and Siemens Camstar MES through CGI/JSON interfaces, enabling reliable machine-to-system communication and improving production traceability across manufacturing processes.
- Designed and implemented ASP.NET Core RESTful APIs for the MapHandling system, delivering wafer map upload, validation, grouping, and workflow capabilities that supported React.js and Vue.js applications while ensuring API quality through Swagger, Postman, and SoapUI testing.
- Optimized enterprise applications by developing efficient Oracle SQL queries, resolving production issues through log analysis, API debugging, and database troubleshooting, and delivering change requests through collaborative GitLab development with cross-functional engineering teams.
- Contributed to successful production releases by supporting UAT, implementing bug fixes and system enhancements, maintaining MES applications, and working closely with Business Analysts and Staff Engineers to improve manufacturing workflows and minimize operational downtime.

Bussiness Architecture Analyst **Accenture solutions sdn bhd** Kelana Jaya,Selangor 06/2025-10/2025

- Designed, developed, and maintained applications using R77 Mobile Builder and Back Office, leveraging JavaScript, T-SQL, C#, and .NET Framework 3.5.
- Successfully integrated and configured applications with Microsoft SQL Server, ensuring reliable data operations and secure storage.
- Enhanced database performance by developing and optimizing T-SQL queries, including modifying stored procedures to streamline business processes.
- Provided solutions to critical issues for international clients, managing troubleshooting and resolution workflows through DevOps ticket escalation systems.
- Served as Test Lead for a major project, overseeing test planning, automation strategy, defect tracking, and release quality to ensure compliance with international standards and client expectations.
- Gained strong domain knowledge in Reckitt's distributor management system, including modules for warehouse, product, customer, and route operations, while expanding expertise in web and mobile application development.

SOFTWARE DEVELOPER **Infoconnect Sdn Bhd** Damansara Jaya,Selangor 07/2023-06/2025

- Engineered and optimized high-performance backend systems using C#, VB.NET, and Microsoft SQL Server to address bug fixes, implement change requests, enhance features, and integrate scalable architectures.
- Contributed to application development and web-based solutions, including DocuFloScan within DocuFlo Product 5/7, ensuring seamless functionality.
- Architected and optimized SQL Server databases, improving query performance, data migrations, transformations, and indexing for efficient data storage and retrieval.
- Developed and automated backend workflows in C# and VB.NET, streamlining data processing and document management. Used iTextSharp and Spire.PDF for advanced PDF generation and extraction ensuring smooth document automation.
- Enhanced and maintained DocuFlo and DocuFloScan, improving document scanning workflows with OCR, and database lookup for intelligent document processing.
- Integrated Microsoft Azure cloud solutions, automating report generation and email delivery of processed files (PDF, Excel, TXT, Tiff) to enhance workflow automation.
- Developed scalable web applications using Bootstrap, HTML, CSS, JavaScript, Angular, and ASPX, ensuring a seamless and responsive user experience.
- Diagnosed and resolved critical DocuFlo 5/7 and docufloscan system issues, improving software reliability, document scanning efficiency, and system stability.
- Designed and developed RESTful APIs in ASP.NET and .NET Core to facilitate real-time data exchange, validate data insertion, and automate database transactions. Built and tested APIs using Postman to verify data integrity and ensure seamless integration with Microsoft SQL Server.
- Earned a Professional Certificate in Flutter Mobile App Development, demonstrating expertise in cross-platform mobile development

Junior Application engineer **Intercity MPC (M) Sdn Bhd** Kota Kemuning, Selangor 07/2022-07/2023

- Designed and implemented applications of Banking statement using Software Pres Integrated Development Enviroment Borland
- Design and develop using Borland Delphi 7 Using Pascal programming to generate data and design For Monthly statement
- Do a task statement task of billing tax from the Majlis Perbandaran state using Delphi and Press initial operations were the sorting of mails manually to allow our clients to focus on their core businesses.
- Just Learning basic Python with using generate PDF by using monthly statement from the bank Developed database by using
- Microsoft visual fox pro and the data pump into Delphi programming to create a pdf
- Debug and testing the statement to the production settledown the problem
- Migrate C Programming statement to the Python Programming statement

METER READER **Tenaga Nasional Berhad** Bera,Pahang 11/2021- 05/2022

- Assigned in residential and business or industrial buildings and facilities to note down the readings of the meters which measure gas, water, electricity and other utility uses.
- Understand instruction from MRE and can together work as a team to sending bill to home-user. o Meter reader get information from residential and commercial utility meters to determine the electricity usage amount.
- We enter the number from the meter to Pda and print to the customer to buy the bill.
- Meter reader be comfortable working with computer database software to save data usage voltage home daily.
- Daily inspection on motorcycle to ensure smooth operation to go the location for us to check the meter.
- Daily inspection of vehicle to ensure smooth meter reader operation.
- Able to operate electronic measuring instruments, and advice on utility consumption

- Support Problem from Ip Address Printer o Ensuring efficiency in PC software
- Maintaining data database
- Learning laravel language programming
- Assisted in helpdesk support from other department
- Support Technical Thing in networking

EDUCATION

Open University Malaysia

2022- 2025

Bachelor Information Technology and Communication with Honours(Part-Time) (CGPA : 3.50/4.00)

Kelana jaya, Selangor

MALAYSIAN UNIVERSITY ENGLISH TEST (MUET)

2021-2026

Band 3.5 / 5++

Karak, Pahang

Politeknik Sultan Mizan Zainal Abidin

Diploma Information Technology and Communication (Technology Digital)
CGPA 3.04/4.00

Dungun, Terengganu

2018-2020

SKILL

- Html | CSS | Java script | Android studio | Mita pp inventor | Bootstrap | React.js | Tailwind.css | Angular | Craco
- Pascal | C++ | Java | Asp.net | Jsp | Java servlet | Python | Borland delphi 7 | Rest Api | Next.js | Node.js | Dart | Flutter | .Net core | C# | Microsoft Visual Basic | iTextSharp (PDF) | Spire.PDF Oracle | Mysql | Microsoft sql
- server (MSSQL) | Firebase | MongoDB | Firebase Microsoft Azure | Aws cloud | Docker | Internet Information
- Services (IIS) | Restful API | Postman
- Adobe Audition | Adobe Photoshop | Adobe Flash

PROJECT

2020

Orbit Key Finder

Politeknik Sultan Zainal Abidin

- Tasked with the responsibility of locating misplaced keys for users.
- Utilized the Orbit Key Finder (OKF) application, employing its advanced tracking system designed specifically for locating keys.
- Leveraged the OKF application's capabilities to identify the lost device using its unique ID, subsequently utilizing Global Positioning System (GPS) technology to track and recover the misplaced keys accurately

2024-2025

Booking Flex

Open University Malaysia

- <https://projectbookingflex.vercel.app>
- A web-based platform that allows users to easily book flight tickets, hotels, and train tickets.
- User-friendly interface for searching and booking travel options.
- Developed the front-end using React.js to create a dynamic and responsive UI.
- Implemented backend APIs where using next.js and handled data storage with MongoDB.
Built with responsive design to ensure compatibility across devices.

CERTIFICATE

Aws Awesome Day

Online conference

2022

- Certified by Amazon web service (Attending cloud aws)

FLUTTER MASTERY: BUILDING CROSS-PLATFORM MOBILE APPLICATIONS

Petaling Jaya One

2024

Certified by Rynet Malaysia Sdn Bhd (899837-K)

AWS-Dev-Developing on Aws

KL eco city

2026

Certified by amazon web services

Award and Achievement

Sekolah Menengah Kebangsaan Temerloh

2017

- 3rd Place – 400m Hurdles (Under 18), MSSP (Majlis Sukan Sekolah Pahang)
- 1st Place – 400m Hurdles (Under 18), MSSD (Majlis Sukan Sekolah Daerah Temerloh)
- 1st Place – 4x400m Relay (Under 18), MSSP
- Certificate of Participation – Football School, MSSD

2016

- 2nd Place – 400m Hurdles (Under 18), MSSP
- 1st Place – 100m Hurdles (Under 18), MSSD
- Certificate of Participation – Track and Field, MSSM (Majlis Sukan Sekolah Malaysia)

2015

- 1st Place – 200m Hurdles (Under 15), MSSD
- Certificates of Participation – Track and Field MSSD
- Certificates of Participation – Track and Field MSSP

Politeknik Sultan Mizan Zainal Abidin, Kuala
Dungun, Terengganu

2019

- Committee Members of Club Inovation dan Design
- Committee Members of club Hockey
